Objective

Hello, I'm a front-end web developer specialized in designing and developing user interfaces and building dynamic websites. I am constantly seeking a web developer position in a stable company, where I can utilize my experience and education to help the company achieve and exceed its goals.

Experience

09/2024 – Present

Front-end web developer (React.js & Next.js)
Wakeb - Riyadh, Saudi Arabia

– Developing cutting-edge front-end applications using React.js and Next.js. Collaborating with a highly skilled team to deliver AI-driven solutions, focusing on user experience and performance optimization.
Contributing to projects that incorporate machine learning, cognitive computing, and advanced data visualization.
Enhancing the functionality and aesthetics of Wakeb's IT services and consulting platforms.

09/2022 – 09/2024

Front-end web developer (React.js)
Wazin Riyadh, Saudi Arabia

– Led the frontend development of Wazin and significantly contributed to its growth as a comprehensive platform that simplifies the expansion of e-commerce for individuals and businesses. Designed and implemented responsive, multi-theme user interfaces, enabling sellers to effortlessly create and manage online stores without the need for developers or designers. Developed an integrated dashboard for seamless management of payments, shipping, and inventory, enhancing operational efficiency and user experience. Optimized frontend performance to meet modern e-commerce standards, ensuring scalability and ease of use to cater to diverse business needs. Wazin aims to empower startups and entrepreneurs to build and manage their online stores efficiently, providing all the necessary tools for successful business operations.

09/2020 – 09/2022	**Front-end web developer, (React.js & Next.js)** **Houya Software - Cairo, Egypt (Saudi Arabia Headquarters)** – Delivered several high-profile websites, showcasing technical expertise and attention to user experience: SaudiDates.sa and SaudiDates.s/dates-recipes – Platforms highlighting dates and related recipes with elegant, user-friendly designs. NCPD.gov.sa – An official government platform emphasizing accessibility, performance, and modern design principles. [KRZ.sa](KRZ.sa) – A dynamic e-commerce website providing an engaging shopping experience. Focused on building interactive, dynamic user interfaces to enhance usability and overall user satisfaction. Ensured websites adhered to modern web standards, delivering high-performance, scalable, and responsive solutions. Collaborated with cross-functional teams to create seamless integration between front-end and back-end systems. Participated in planning and design discussions, contributing innovative ideas to improve project outcomes.
08/2019 – 08/2020	**Front-end web developer, (React.js)** **Bit68 Technology - Cairo, Egypt (Headquarters)** – Specialized in developing modern, user-centric front-end interfaces using React.js. Collaborated with a team of enthusiastic developers to deliver innovative web solutions aligned with clients' specific needs. Contributed to building dynamic, responsive, and scalable user interfaces that elevated the customer experience. Worked closely with backend teams utilizing AWS, Python, and Django to ensure seamless integration between front-end and back-end systems. Leveraged technologies like HTML5, CSS3, and React Framework to develop fast and efficient web applications.

Freelancing

- Part-time web developer at Way14 for Technical Production.
- Freelance web developer for Juliat-Divers, Yachts and Cruises.
- Part-time React Developer at ICBS Educational Foundation, in Engineering and Medical Sciences.
- Freelance web developer for Al-Sulaiman Real Estate Development Company.

Education

- **Ruote Academy Diploma in Information Technology (Web Development)**
  Full Stack Developer I completed a diploma in Information Technology (Web Development) from Ruote Academy. During this program, I received comprehensive training in Full Stack development, gaining experience and knowledge in both front-end and back-end technologies. Subsequently, I specialized in front-end web development with a specific focus on React,

enhancing my skills in building responsive and dynamic user interfaces.
2019 – 2020

- **Online Courses**
Front-End Web Development and React Development
2018 – 2019

Skills

Technical Skills

Front-end web developer

HTML	HTML5	CSS	CSS3
JavaScript	ECMAScript (ES6)	TypeScript	jQuery
Bootstrap	Tailwind	MDB	PWA
Mobile First	API	Unit Testing	Babel.js
Web Back	Accesability	Design Patterns	plugin.js
Gulp.js	AJAX	OOP	
React.js	Next.js	React-Bootstrap	MaterialUi
Recoil.js	Redux.js	Redux-Toolkit	React Query
Sass	Git/GitHub/GitLab	RWD (Responsive Web Design)	
Figma	Adobe XD		

Languages

Arabic : Bilingual proficiency.   **English** : Professional working proficiency
